Classical Greek Assignment 13

• The Greek quotation to memorize this week is from the *Apology* by Plato in which the

philosopher quotes Socrates: εν οἶδα ὅτι οὐδὲν οἶδα. It means literally, One thing I know, that I know nothing. When we search for truth about a matter, it is good to begin at that position of humility. The Socratic method of investigation involves asking questions that reveal the issues underpinning our differing positions on the nature of truth or reality. Socrates' statement, however, might lead one to take on the position of complete skepticism—we can never know anything. This position of total skepticism was countered by the 17th-century philosopher

Descartes in his *Meditations on First Philosophy*. He said *Cogito ergo sum*, or *I think therefore I am*, essentially saying that *No*, *at the very least I can know that I exist*. Other knowledge can be built on this foundational assertion.

• We are now moving onto another tense, called the *imperfect*. In English, we translate it into what we the *past progressive*. The simple past would be "I washed." The past progressive would be was (or were) washing.
